MESSAGE FROM THE FOUNDERS

Dear Valued Partner,

Thank you for exploring EcoSouLife and joining us on our journey to create a more sustainable future.

By considering our products, you're already taking a step toward **reducing waste, conserving resources, and protecting our planet for generations to come.** We are excited to share our mission and the **positive impact we can make together.**

At EcoSouLife, we believe sustainability should never be a compromise. **Every product we design embodies our philosophy: safer for me, safer for the planet.** Our eco-friendly solutions empower individuals and businesses to make conscious choices without sacrificing quality or convenience.

Choosing EcoSouLife means supporting a greener, healthier world. Together, we can reduce pollution, preserve ecosystems, and **foster a culture of environmental responsibility.**

Let's continue this journey together, one product, one choice at a time.

With gratitude,

The EcoSouLife Team

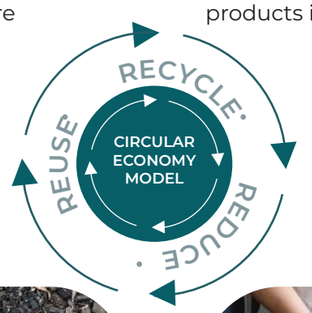
CIRCULAR ECONOMY

We design compostable product solutions that **support a zero-waste circular economy.** From using responsibly sourced materials to employing eco-certified manufacturing practices, and offering disposal methods that ensure resources are either reused or regenerated, our approach is **all about sustainability at every step.**

Raw Material Collected → Processed into Product

We source renewable, natural, or recycled materials, such as wooden, paper or areca nut leaves, that are environmentally sustainable. Our focus is on materials that would otherwise go to waste, ensuring no resources are unnecessarily depleted.

Using eco-friendly manufacturing processes, these raw materials are transformed into high quality products. During production, we ensure minimal waste by reusing any offcuts or by-products in the production cycle.



Return to Nature

At the end of its lifecycle, our products decomposes naturally and returns to the earth without leaving harmful residues. This closes the loop, creating a zero-waste cycle that aligns perfectly with the principles of the circular economy.

Products Ready to Use

The finished product is thoughtfully designed for durability and functionality while maintaining a low environmental footprint. Our products are safe for everyday use and ideal for a variety of applications.

LEARNING FROM PAST

History has shown us the lasting impact of unsustainable choices.
If humanity had relied on single-use plastics, foams, and metals from the start,
our planet would be burdened with towering landfills, polluted oceans, and ecosystems pushed to the brink.

TIN CANS CAN BIODEGRADE IN UP TO 50 YEARS.

Armstrong's tin can from departure won't harm the environment anymore, but the one you discarded yesterday will take 50 more years to break down.

ALUMINIUM CANS CAN BIODEGRADE IN UP TO 200 YEARS.

If Napoleon had thrown an aluminium can in Corsica, it would have nearly decomposed by now. If he had done the same in Russia in 1812, it would still be polluting the environment

PLASTIC CONTAINERS BIODEGRADE FROM 450 YEARS TO NEVER.

Michelangelo's masterpieces remain till today. If he had used plastic bowls for paint, they'd still be around.

PLASTIC BAGS BIODEGRADE FROM 500 YEARS TO NEVER.

If Copernicus used a plastic bag for his telescope, it would still be breaking down today.

GLASS BOTTLES TAKE UP TO A MILLION YEARS TO BIODEGRADE.

Imagine an upright man left a glass bottle in the rainforest a million years ago; it's only now turning to dust. The glass bottle you discarded today will also take another million years to decompose.

STYROFOAM CUPS TAKE FOREVER TO BIODEGRADE.

If Lucy, AL 288-1, tossed her Styrofoam cup on the African Savannah 3.2 million years ago, we could still find it today.

OUR SOCIAL IMPACT

Every purchase from our Areca Nut Leaf Range directly transforms lives by **supporting the livelihood of an entire village in India.** This initiative goes far beyond offering sustainable products, it's a catalyst for **meaningful social change.**

By creating jobs and empowering women, who make up an inspiring 85% of the factory's workforce, **the Areca Nut Leaf range is driving progress and strengthening communities.** Each item in the collection is a symbol of hope, equality, and opportunity, paving the way for a brighter, more sustainable future for both people and the planet.

HARVEST RANGE

The Harvest Range, made from bamboo pulp and sugarcane, is perfect for BBQs, picnics, and any gathering. Sustainable, stylish, and biodegradable, it enhances your indoor and outdoor events while leaving no trace on the planet.

HARVEST RANGE

PFAS FREE

HOME COMPOSTABLE

DISPOSABLE

MICROWAVE SAFE
UP TO 2 MINS

HEAT & COLD RESISTANT

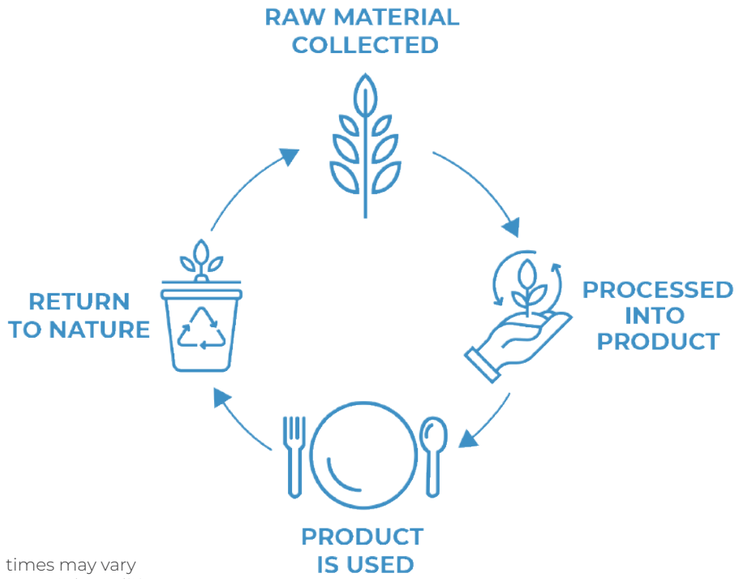
LIQUID RESISTANT

CERTIFIED PRODUCT

Made from raw materials like bamboo pulp & sugarcane.
No wax or plastic coating.

By choosing Harvest products, you actively help reduce pollution caused by traditional burning methods used to dispose of agricultural waste. Instead of burning, we transform waste materials like bamboo pulp and sugarcane—fast-growing and highly renewable resources—into eco-friendly products.

When discarded, our products naturally biodegrade. The process is initiated by environmental factors such as reduced oxygen, weather fluctuations, and the presence of bacteria, ensuring they break down safely and return to nature without leaving a trace.



* Actual degradation times may vary depending on environmental conditions.

CERTIFIED PRODUCT

The World's First Coffee Pod That Leaves Nothing Behind.

Our coffee pods are a new and innovative solution designed to change the way we enjoy coffee. They eliminate unnecessary waste and help reduce pollution caused by traditional coffee pods.

Fully eco-friendly and naturally biodegradable, these pods deliver great coffee while returning safely to nature, proving that sustainability and quality can go hand in hand.

DID YOU KNOW?

Researchers found that plastic coffee capsules can release hormone-disrupting chemicals linked to infertility and certain cancers. Small amounts may build up in the body over time.

NEW PRODUCT

TERRA SHAPE RANGE

WORLDS FIRST

FOOD SAFE

COMPOSTABLE · DISPOSABLE · FREEZER SAFE · HEAT & COLD RESISTANT · MICROWAVE SAFE (UP TO 2 MINS) · LIQUID RESISTANT · STRONG & DURABLE · CERTIFIED PRODUCT

Crafted from rapidly renewable bamboo fiber and bagasse.

Our Terra Shape Range is produced using a wet-pressed pulp molding process. The plant fibers are evenly mixed in a pulping system, then transported to fully automated production lines. There, the pulp is formed, dried, and shaped through suction.

The result is a new generation of 100% biodegradable material, verified by BPI and DIN CERTCO to fully break down within 12 weeks. From raw bamboo and bagasse, the material goes through pulping, mixing, molding, drying, and trimming— creating products that are smooth, soft to the touch, and environmentally responsible.

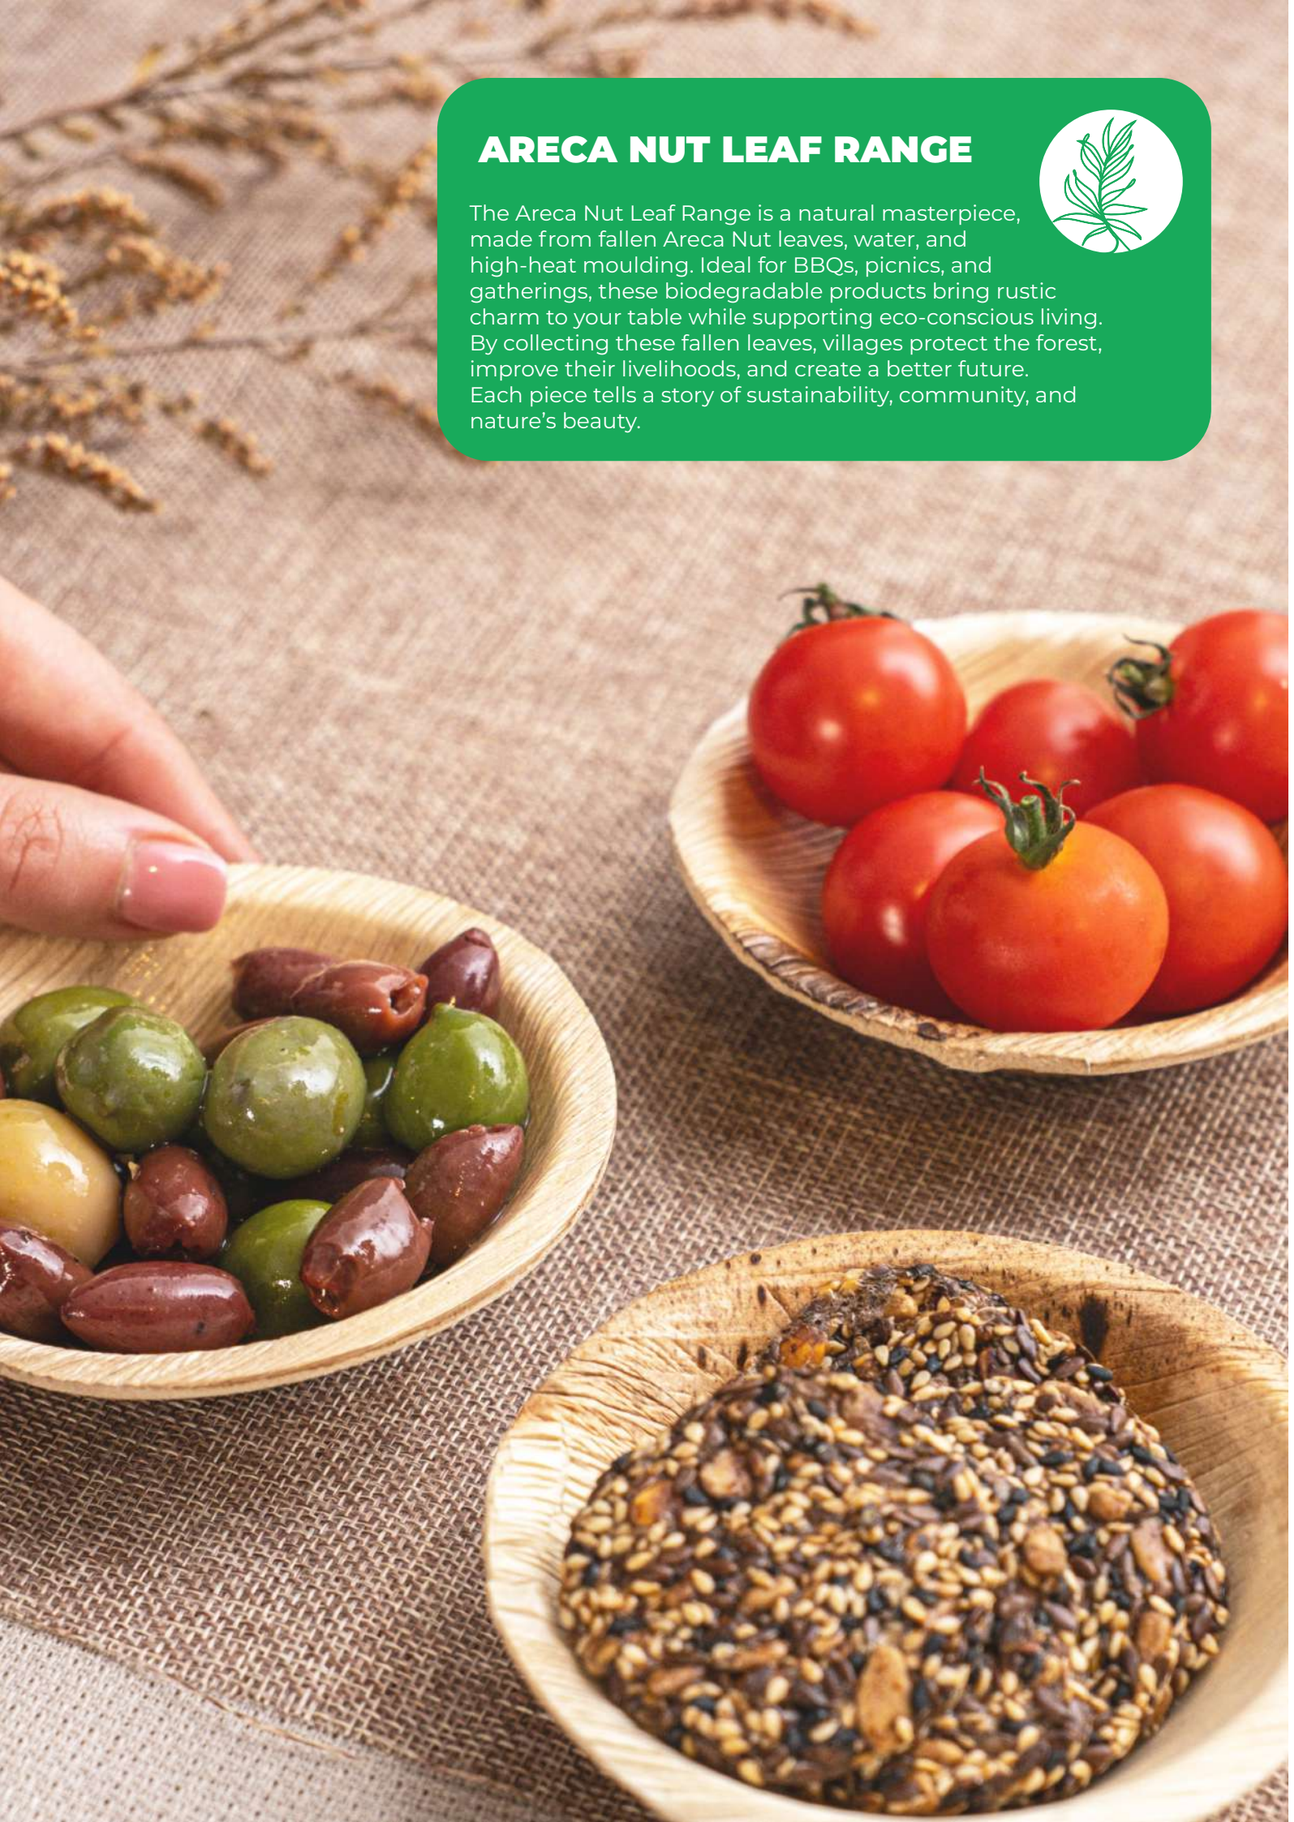
HARVEST-TERRA SHAPE



ARECA NUT LEAF RANGE

The Areca Nut Leaf Range is a natural masterpiece, made from fallen Areca Nut leaves, water, and high-heat moulding. Ideal for BBQs, picnics, and gatherings, these biodegradable products bring rustic charm to your table while supporting eco-conscious living. By collecting these fallen leaves, villages protect the forest, improve their livelihoods, and create a better future. Each piece tells a story of sustainability, community, and nature's beauty.

CERTIFIED PRODUCT

Made from Areca Nut Leaves, water & high-heat mould!
Raw materials include: Fallen & dried Areca Nut Leaves.

Naturally fallen leaves are collected, washed and then put through a high-heat mould press to shape them into our designs. Before packaging, they are UV-sterilized and ready for the table.

Our forests are untouched in the collection and production processes.
The villages collect these naturally fallen leaves and in turn protect the forest.
It is providing these villagers both an improved livelihood and also a better place to stay!

ARECA NUT LEAF

BACK TO NATURE RANGE

The Back to Nature Range brings nature's purity to your table, crafted from sustainable materials like FSC-certified birch wood, bamboo pulp, and sugarcane. Eco-friendly, biodegradable, and guilt-free, these products let you savor every moment while leaving nothing behind but a positive impact.

BACK TO NATURE RANGE

FOOD SAFE

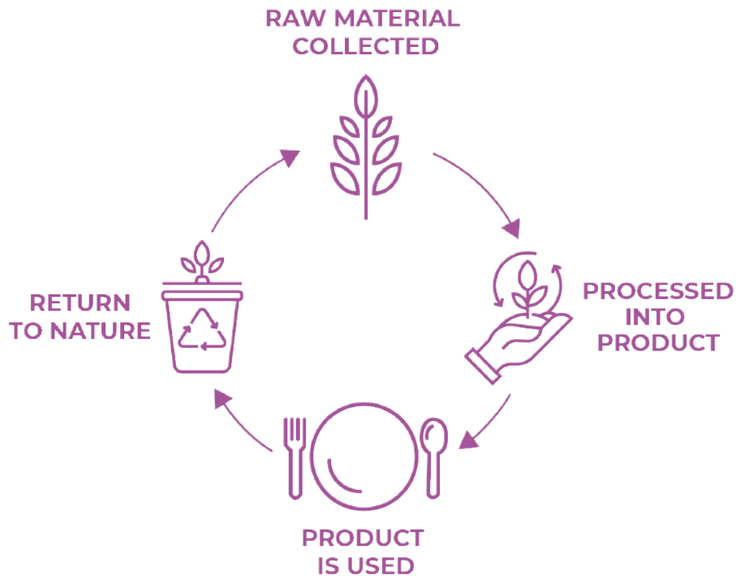
COMPOSTABLE · DISPOSABLE · HEAT & COLD RESISTANT · LIQUID RESISTANT · STRONG & DURABLE · CERTIFIED PRODUCT

Made from natural materials!
Raw materials: FSC-Cert. Birch wood, Bamboo Pulp, Sugarcane or Recycled Paper.

Replace ordinary plastic with this natural and sustainable options.

Unlike plastics or paper, our products are purely-plant based, eco-friendly and constitute zero waste to the environment. A guilt-free way of enjoying your food & drinks.

Our products are designed to biodegrade when buried or left behind in nature.
The lack of oxygen, changes in weather and build-up of bacteria cause the reaction to begin.



* Actual degradation times may vary depending on environmental conditions.

WOODEN STRAWS

FOOD SAFE

End the global straw pandemic! Switch to biodegradable, natural, high-quality wooden straws. Crafted from sustainably sourced wood, they stay sturdy for up to 24 hours in a drink without ever turning soggy or soft. A plastic-free, guilt-free choice that's better for your drink and better for the planet.

ECO COLLEGE CUP & ECO-FRIENDLY BEER PONG SET: A STEP TOWARDS SUSTAINABILITY

At EcoSouLife®, we're dedicated to ending plastic waste with innovative, eco-friendly solutions.
Our Eco College Cup features a **water-based dispersion paper liner that is certified plastic-free, home compostable, fully recyclable, and compliant with EU food safety regulations.**
Sourced from sustainably managed wood and free of harmful chemicals, it's a safe and responsible choice for both hot and cold beverages.

DID YOU KNOW?

PE lined paper cups are still difficult to recycle and degrade due to difficult plastic separation. PE lined cups are not plastic free, recyclable, biodegradable or compostable

Now, you can enjoy our Eco College Cups as part of our new eco-friendly beer pong set! This set features our sleek, sturdy, and stylish red party cups, **made from the same bio-coated paper as our Eco College Cups.** Designed to naturally decompose once buried, these cups offer a guilt-free and sustainable alternative to wasteful plastic.

RELIFE RANGE

RELIFE SALAD BOWL

FOOD SAFE

NEW PRODUCT

Practical and Trendy! The Relife Salad Bowl is available in three different sizes, making it perfect for any occasion. Whether you're enjoying a fresh salad at home or taking it to a picnic, this versatile bowl is designed with convenience in mind. What makes it even more unique? The lid doubles as a chopping board, adding extra functionality. Plus, it's made from durable, recycled plastic bottles, offering a sustainable solution for your everyday needs.
