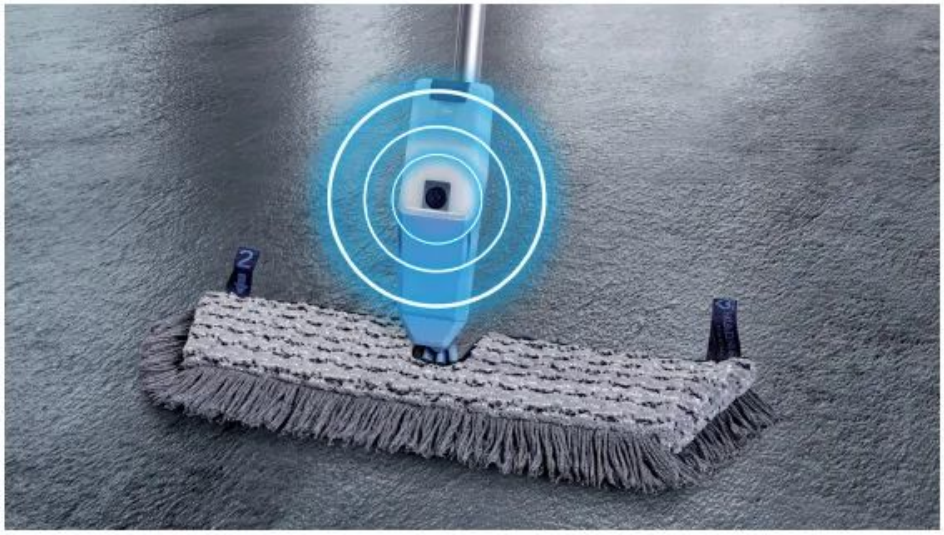
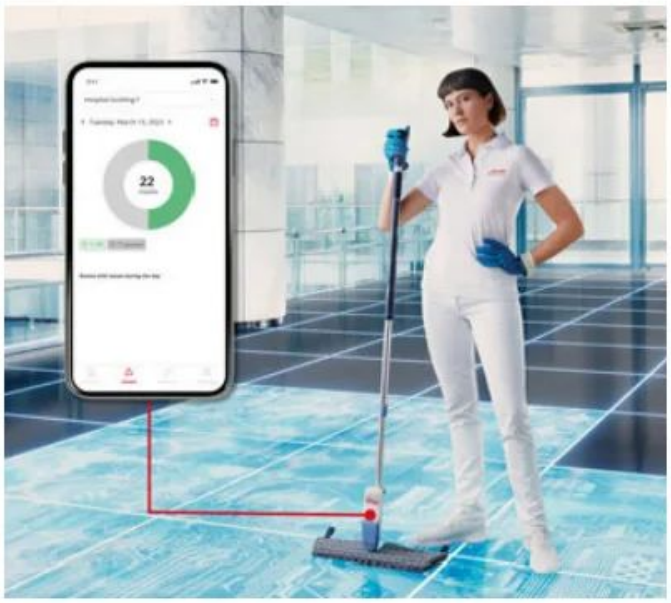
# EviSense

Evidence | Guidance | Support

# EviSense

Evidence | Guidance | Support





**Green light**
when a fresh mop is attached

**Blue light**
when a wall tag is recognized

**Orange light**
when the mop has reached its cleaning capacity

- Orange blinking: The cleaner should flip the mop
- Constant orange: The cleaner should replace the mop

**Red light**
when a mop issue is detected

- Red blinking: A used mop has been put on the frame
- Constant red: A new room is entered with a used mop.

# EviSense® – supercharged for professionals.

**EviSense®** gives proof of operation to SOP's

**EviSense®** guarentees safe, secure and GDPR compliant data processing without interfering with the IT-infrastructure of the building

**EviSense®** provides real time proof of work: which rooms have been cleaned, when and how

**EviSense®** means extra guidance and hygiene without changing cleaning routines

**EviSense®** supports cleaners to get better every day by guided learning on the job

**EviSense®** is easy to install and requires no training
